KEY DATA

imaging all the women

Our ambition

Delmont imaging's mission is to improve the care and management of all patients, regardless of age and future, by providing the profession with innovative, effective and less traumatic solutions. Our products are in line with the general trend of the outpatient surgery and more particularly with the «See & Treat» concepts.

KEY PRODUCTS

Imaging

iCare+ is a complete imaging column dedicated to hysteroscopy in consultation or ambulatory rooms. Quality, simplicity and efficiency are the values of this solution.

It includes an HD camera, an LED light source, a compact cart and an iPad Pro with applications that can be downloaded from the AppStore.

imagyn : allows patient management, viewing of the iCare video stream and to complete and high quality hysteroscopy report.

MyReport : imagyn App but with a generic report.

iZap : Allows control and monitoring of iCare.

Hysteroscopic instrumentation

Our range of hysteroscopic instrumentation features two key products:

- **EasyCare.**

An energy-free instrument set, combining performance and reduced diameter, making it ideal for nulliparous patients and infertile couples.

- **ReseCare.**

A bipolar resector with a **6mm diameter**.

The reduced dilatation makes it ideal for nulliparous patients, infertile couples and menopausal women or with a stenotic cervix.

Our electrodes are available sterile or reusable.

Colposcopy

The ideal complement to our solutions for gynaecology consulting rooms, with the same standards of quality, ergonomics, reliability and efficiency.

Several configurations are available for ergonomics, magnification levels or choice of lens. A large list of accessories is also available.

 **imagyn**

Our imagyn application has also evolved to include colposcopy reports in addition to hysteroscopy.

The irrigation pump

The irrigation pump is an essential complement to a quality and safe hysteroscopy.

iFlow is mainly proposed in hysteroscopy but its many programs make it suitable to operate also in Urology, Laparoscopy and Arthroscopy.

Its main key points:

- Accurate pressure measurement
- Controlled suction via 2 speeds
- RFID control of irrigation tubes
- Clear display of key information and alerts
- Easy handling of the pump and tubing
- Automatic deficit calculation

The laparoscopic range

This new catalogue contains more than 150 referenced instruments such as:

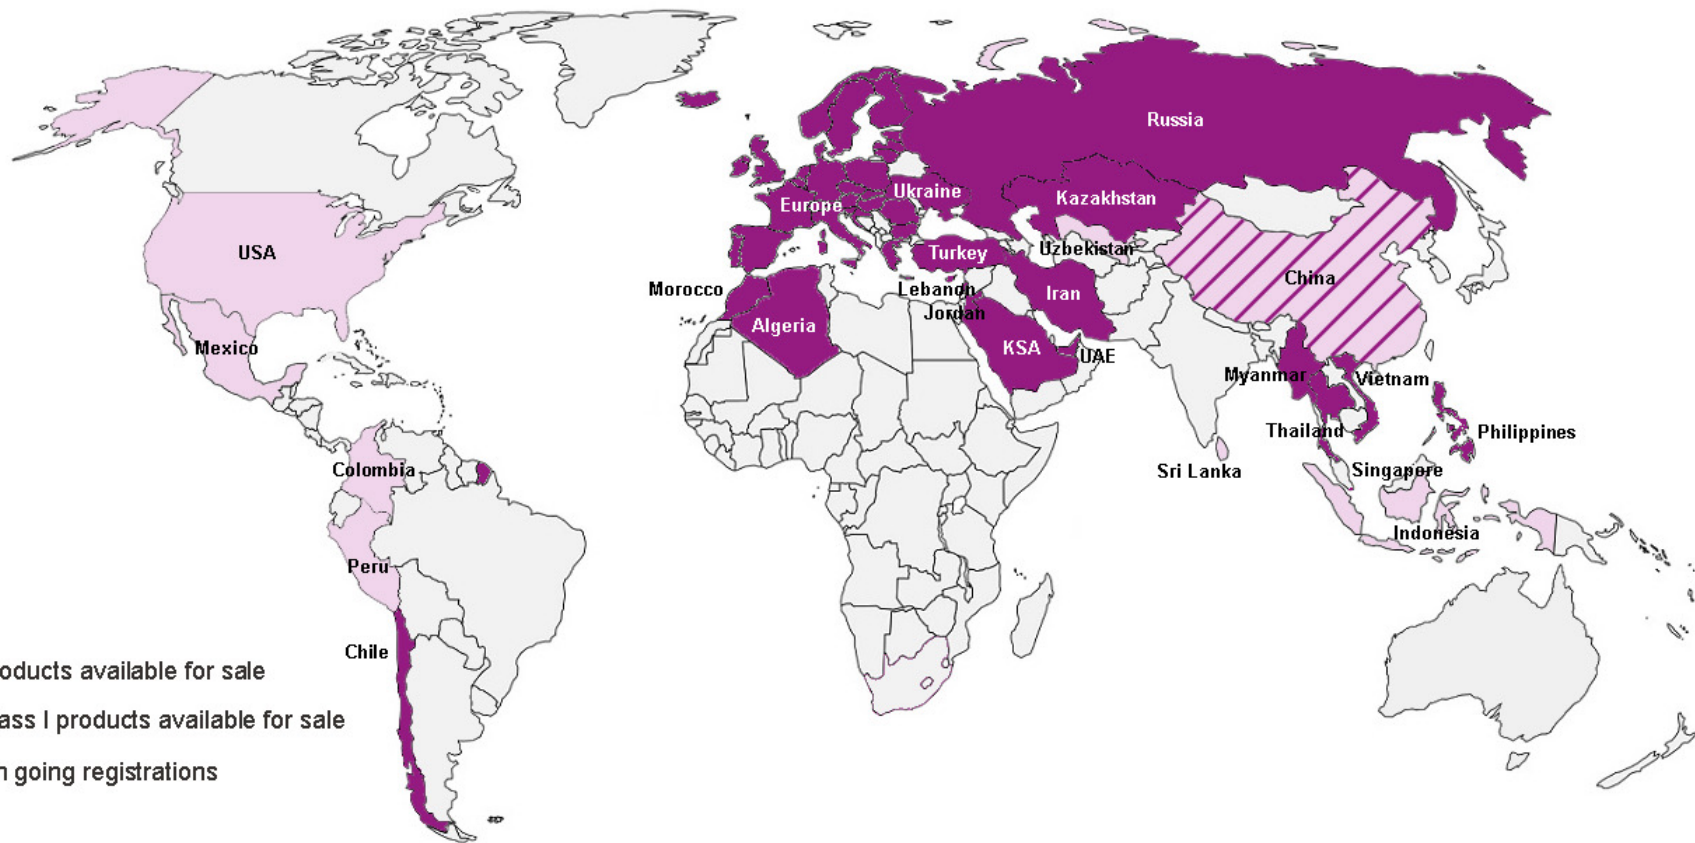

- **Laparoscopes**
- **Trocars**
- **Grasping and dissecting forceps**
- **Biopsy instruments and scissors**
- **Suture and ligature**
- **Accessories**
- **Uterine manipulators**

DEPARTMENTS

Regulatory

Research & Development

Innovation is in our DNA and at the very core of the company's activity, with the firm commitment to provide surgeons with ever more efficient tools respecting patients

Our list of projects covers a wide variety of topics ranging from surgical instrumentation to new Apple applications!

Delmont already applied for several patents.

Marketing

- Participation in numerous workshops

- Participation in many congresses and webinars

- Creation & publication of a serie that contains interviews of our users

Thank you for your attention !
