## A motivated team

The founders of Delmont all benefit from a long and successful experience in the field of medical devices, and more particularly endoscopy. Young engineers from prestigious schools, came to swell the ranks of our workforce, bringing a dynamic freshness. Experienced sales representatives spread all around the world, guarantee local support to all our customers.

## Research & Development

Innovation is in our DNA and at the very core of the company's activity, with the firm commitment to provide surgeons with ever more efficient tools respecting patients. Our project pipeline includes collaborative developments with European companies and R&D Laboratories. Delmont already applied for several patents.

## Quality & Regulatory

Delmont imaging has since day one, focused on delivering highest quality products with full CE certification and good manufacturing practice certification ISO 13485:2016. Our products are now registered in more that 50 countries across the world and this number is continuously growing.

## A scientific council

Since its creation, Delmont has set up a scientific council to guide its R&D work. It includes surgeons from different countries and chaired by Prof. Hervé Fernandez, Head of Kremlin-Bicêtre France.

## Guarantees of sustainability

Delmont's equity has permanently been increased thanks to fundraisings and French BPI support. Our capitalization matches our ambitions and can support our long term R&D and registrations programs.

## Environment

Delmont imaging is actively engaged in several actions and programs aiming at protecting the environment, preserving natural resources and minimizing waste. The head office is located in one of the very few industrial areas both certified ISO 14001 and ISO 50001. Delmont imaging is also sponsoring a Bio beehive.

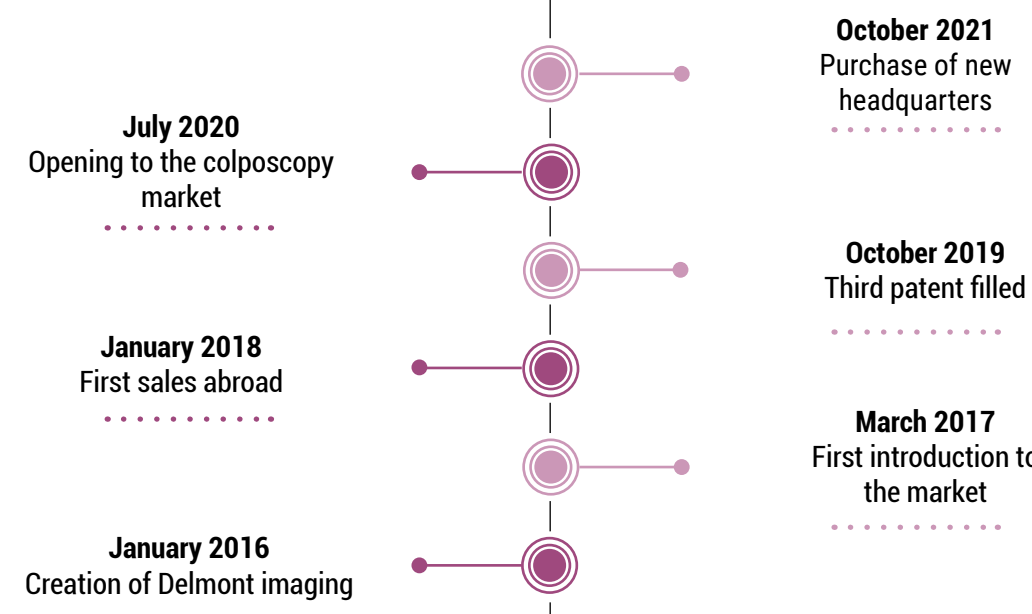

## Our vision

Delmont imaging's mission is to improve the care and management of all patients, regardless of age and future, by providing the profession with innovative, effective and less traumatic solutions. Our products are in line with the general trend of the outpatient surgery and more particularly with the «See & Treat» concepts.

## iCare+

NEW

### The endoscopy camera designed for dedicated rooms

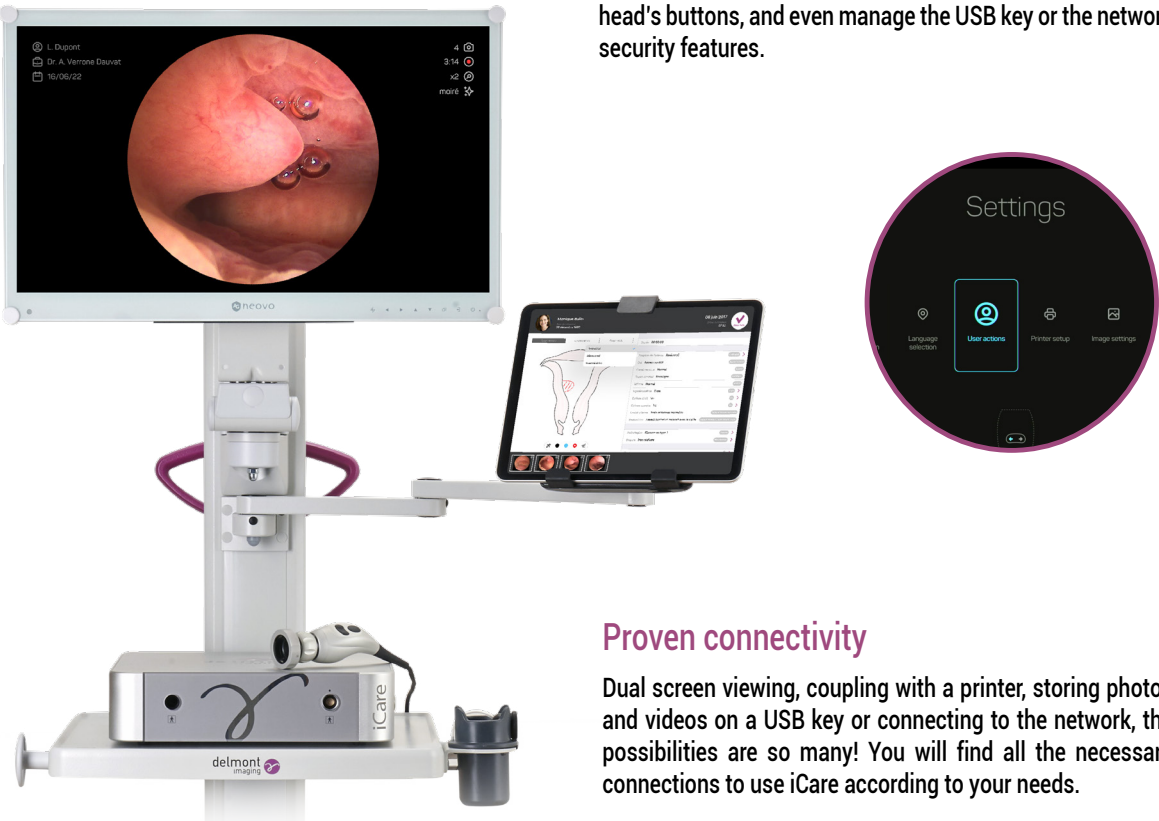

The combination of light source and camera in a single control unit significantly reduces the volume without limiting performance. The HD CMOS sensor with a resolution of over 2 million pixels provides unrivalled definition outside of operating room and our LED light source provides the power to ensure a bright image, even with a small endoscope. Combining design, simplicity, and performance, iCare is the ideal solution for dedicated rooms! Find the comfort of an operating room for the optimal care of your patients.

### Image settings for performance

Our high resolution camera delivers outstanding image quality. Enhance it to your liking with one of the three image presets. For the most demanding, a manual setting is also available.

### Intuitive navigation and clear display of key information

Our new graphical user interface offers a unique user experience. Important information is provided to you during your examination without compromising your visualization. You can easily access various settings, customize camera head's buttons, and even manage the USB key or the network security features.

### Proven connectivity

Dual screen viewing, coupling with a printer, storing photos and videos on a USB key or connecting to the network, the possibilities are so many! You will find all the necessary connections to use iCare according to your needs.

### The patented answer to a functional need

Our latest technological innovation, SLIDE, eliminates the compatibility issue between the different light cables standards. You will be able to operate with all your instruments without concerns. iCare takes care of everything! The standard switch is done inside the control unit for more simplicity and better design, but above all to always provide the same light performance.

### A new way to manage your diagnostic hysteroscopy

Developed for the iPad Pro and available on the AppStore, our imagyn application allows you to manage your diagnostic hysteroscopy exams. From the creation of the patient file to the sharing of the report, everything has been designed to offer you a high- level user experience: the perfect alliance between efficiency, relevance and intuitiveness.

### In office setting or in the hospital, imagyn adapts to your needs

In an office practice, back up and secure your data on a NAS (Network Attached Storage) compatible with imagyn. Whatever the situation with your iPad (loss, breakage, etc.) you can restore all your information on a new iPad.

In the clinic or hospital, share examination reports over the network so that they automatically integrate into the electronic health record (EHR). Don't waste time doing this manually, imagyn and iCare do it for you using the standardised HL7 protocol. The Worklist can also be provided to imagyn by the care centre using the DICOM standard.

### A complete report in just a few clicks!

everything has been thought out in order to transform the laborious task of writing a report into a quick and intuitive experience, without sacrificing either its quality or its completeness. In just a few seconds, finalize your document which includes: annotatable anatomical drawings and photos of the examination, and more than a dozen text fields to fill in.

The quality of the reports you share with your patients and colleagues has never been so high!

Cameras and light sources

iCare

Our solution integrates a LED light source and a HD camera in a single unit. All specifications are below:

General specifications:

Dimensions of the unit: 310 x 75 x 310 mm  
Weight of the control unit: 4.4 kg  
Weight of the camera head: 400 g  
Power supply: (100-230 V ~ 50/60 Hz)  
Power consumption: 230 VA  
2 HDMI outputs and 1 3G-SDI output  
Supplied with Wi-Fi antennas and a 32Gb USB storage key

Camera specifications:

Waterproof HD CMOS sensor  
Resolution: 1920 x 1080  
Scanning: progressive  
3 pre-programmed buttons  
C-mount lens. F=22mm

Light source specifications:

LED technology  
Nominal power: 95W (equivalent to a 300W Xenon light source)  
Color temperature of 6 000°K  
Typical LED lifetime of 50 000 hours  
Automatic detection of presence/absence of the light cable

Reference	Description
D100 200 004	Stand for iPad Pro Secure version

Monitors

Reference	Description
D200 110 000	22" Neovo monitor Full HD Resolution Eco-intelligent sensor for low power consumption Highly resistant optical glass for easy cleaning
D200 110 001	22" Neovo monitor - medical grade Same specifications as D200 110 000
D200 110 003	24" Neovo monitor Full HD Resolution Eco-intelligent sensor for low power consumption Highly resistant optical glass for easy cleaning
D200 110 004	24" Neovo monitor - medical grade Same specifications as D200 110 003

Irrigation pumps

iFlow

**iFlow specifications:**  
Touchscreen  
RFID technology  
Suction power: maximum 2 L/min  
Power supply: (100-240 V~; 50/60 Hz)  
Power consumption: 80 VA  
Dimensions: 380 x 148 x 388 mm  
Weight: 6.3 kg  
Classification: Class I, Type BF, IP 41

Reference	Description
D110 100 011	iFlow. Irrigation and suction pump Without programs. To associate with transponders
D110 100 500	iFlow. Irrigation and suction pump Hysteroscopy program included
D110 100 501	iFlow. Irrigation and suction pump Laparoscopy and Hysteroscopy programs included

Reference	Description
D110 100 007	Transponder. Hysteroscopy Program - Pressure range: 15 to 150 mmHg - Flow range: 50 to 500 mL/min
D110 100 004	Transponder. Laparoscopy Program - Pressure range: not configurable - Flow range: 1.0 to 1.8 L/min
D110 100 008	Transponder. Arthroscopy Program - Pressure range: 5 to 150 mmHg - Flow range: 0.1 to 1.8 L/min
D110 100 009	Transponder. Urology Program - Pressure range: 10 to 90 mmHg - Flow range: 25 to 500 mL/min

Tubing & accessories

Reference	Description
D110 100 001	Single-use irrigation tube Provided sterile. Box of 10 tubes With RFID technology
D110 100 005	Multi-use irrigation tube Reusable 20 times With RFID technology

Reference	Description
D110 100 002	Disposable suction tube With 2 connectors. Provided sterile. Box of 10 tubes

Reference	Description
D110 100 003	Vacuum suction tube with filter Usable for a period of 30 days

Reference	Description
D110 100 006	Container for secretions - 3L Delivered in pairs

Reference	Description
D110 100 010	Double foot pedal control On / Pause / Stop irrigation

Colposcopes

Complete colposcopes

**Swing arm colposcope**  
Weight: 44kg  
Height adjustment range: 335 -1 295mm  
Apochromatic lenses  
Available fixed lenses: 175, 200, 250, 300, 400mm  
5 magnifications: 2.83x; 4.25x; 7.08x; 11.33x; 17.71x  
45° binocular head  
Light: LED 100,000 lux  
Eyepiece: 12.5x  
Green filter

Reference	Description
D100 300 502	Swing arm colposcope With 300mm objective Fine focus range on fixed lens: 11mm
D100 300 503	Swing arm colposcope With variable focale length

**Over the shoulder colposcope**  
Weight: 44kg  
Height adjustment range: 635 -1 295mm  
Apochromatic lenses  
Available fixed lenses: 175, 200, 250, 300, 400mm  
5 magnifications: 2.83x; 4.25x; 7.08x; 11.33x; 17.71x  
45° binocular head  
Light: LED 100,000 lux  
Eyepiece: 12.5x  
Green filter

Reference	Description
D100 300 506	Over the shoulder colposcope With 300mm objective Fine focus range on fixed lens: 11mm
D100 300 507	Over the shoulder colposcope With variable focale length

**Straight stand colposcope**  
Weight: 18.14kg  
Height adjustment range: 1 016 -1 193mm  
Apochromatic lenses  
Available fixed lenses: 175, 200, 250, 300, 400mm  
3 magnifications: 4.25x; 7.08x; 11.33x  
45° binocular head  
Light: LED 100,000 lux  
Eyepiece: 12.5x  
Green filter

Reference	Description
D100 300 500	Colposcope straight stand With 300mm objective Fine focus range on fixed lens: 11mm
D100 300 501	Colposcope straight stand With variable focale length

Accessories

Reference	Description
D100 300 510	Complete kit for camera video Double beam splitter, video camera adapter and C-mount adapter included

Reference	Description
D100 300 003	Double beam splitter 50/50 & 20/80

Reference	Description
D100 300 005	Video camera adapter To connect to a beam splitter

Reference	Description
D100 300 006	C-mount to endoscope eye-piece adapter Colour: Purple

Reference	Description
D100 300 051	HERO GoPro 5

Reference	Description
D100 300 009	Camera adapter

Reference	Description
D100 300 010	Reflex camera Canon EOS 2000D without lens

Reference	Description
D100 300 004	Variofocus. Variable focal length lens F=200 to 350mm

Reference	Description
D100 300 020	Colposcope objective with fixed focal F=175mm
D100 300 021	Colposcope objective with fixed focal F=200mm
D100 300 022	Colposcope objective with fixed focal F=250mm
D100 300 023	Colposcope objective with fixed focal F=300mm
D100 300 024	Colposcope objective with fixed focal F=400mm

Reference	Description
D100 300 511	Micromanipulator for CO2 laser
D100 300 013	CO2 laser adapter for micromanipulator

Reference	Description
D100 300 052	2D assistant observer teaching head

Reference	Description
D100 300 053	3D assistant observer teaching head

Reference	Description
D100 300 008	Colposcope mount for attachment to Schmitz chair
D100 300 032	Colposcope mount for attachment to Lemi chair

HF Generators

NEW

iSpark generator

**iSpark specifications:**  
Touchscreen  
Smart Device System  
Automatic power regulation  
Power supply: (220-240 V~ ; 50/60 Hz)  
Power consumption: 1350 VA  
Dimensions: 305 x 141 x 385 mm  
Weight: 7 kg  
Classification: Class IIb, Type CF

Reference	Description
D100 400 000	iSpark electrosurgery unit All programs enabled
D100 400 001	iSpark electrosurgery unit Only native programs enabled
D100 400 002	iSpark electrosurgery unit UROGYN programs enabled

Accessories

Reference	Description
D100 400 003	Wired two-pedal footswitch Cut and coagulation

Reference	Description
D100 400 004	Wired one-pedal footswitch Coagulation

Reference	Description
D100 400 005	Cart for iSpark electrosurgery unit With basket for accessories and case for argon cylinder

Ultrasonic dissection system

NEW

Ultrasonic energy generator

**iScalpel specifications:**  
Frequency range: 30-80kHz  
Dimensions (LxHxW): 36 x 17.7 x 39cm  
Weight: 6.5kg  
Touchscreen  
Self-inspection program  
Ingress Protection: IP 2X

Reference	Description
D300 300 000	Ultrasonic generator

Ultrasonic dissection handles

Reference	Description
D300 300 006	<b>Ultrasonic dissection handle 45cm</b> Ø 5.5mm, 45° single action jaw Actuator on the handle's grip to open/close Rotation module (360°) Resonance frequency: 55.5kHz Single use product, sterile, delivery in boxes of 3
D300 300 002	<b>Ultrasonic dissection handle 36cm</b> Ø 5.5mm, 45° single action jaw Actuator on the handle's grip to open/close Rotation module (360°) Resonance frequency: 55.5kHz Single use product, sterile, delivery in boxes of 3
D300 300 003	<b>Ultrasonic dissection handle 23cm</b> Ø 5.5mm, 45° single action jaw Actuator on the handle's grip to open/close Rotation module (360°) Resonance frequency: 55.5kHz Single use product, sterile, delivery in boxes of 3
D300 300 004	<b>Ultrasonic dissection handle 14cm</b> Ø 5.5mm, 45° single action jaw Actuator on the handle's grip to open/close Rotation module (360°) Resonance frequency: 55.5kHz Single use product, sterile, delivery in boxes of 3

Reference	Description
D300 300 007	<b>Ultrasonic dissection short handle</b> 45° single action jaw Jaw's working length: 9cm Rotation module (240°) Resonance frequency: 55.5kHz Single use product, sterile, delivery in boxes of 5

Transducers

Reference	Description
D300 300 001	<b>Transducer</b> Compatible with ultrasonic dissection handles: D300 300 006, D300 300 002, D300 300 003, D300 300 004 Fréquence de résonance: 55.5kHz Sterilisable, 100 uses guaranteed

Reference	Description
D300 300 008	<b>Transducer for ultrasonic dissection short handle</b> Compatible with ultrasonic dissection short handle: D300 300 007 Resonance frequency: 55.5kHz Sterilisable, 100 uses guaranteed

Hysteroscopy systems

EasyCare

Pr. H. Fernandez,  
Head of the Department of OB/GYN  
of the Kremlin Bicêtre Hospital. France

The comprehensive solution for the safest See&Treat hysteroscopies

« Many procedures can be performed in consulting room during a diagnostic hysteroscopy, avoiding your patients to come back for hospitalization under anesthesia. This is one of the many benefits of the See&Treat protocole, as well as the immediate care of the patient and the reduction of operating theatre programs, making room for heavier surgeries. To achieve See&Treat serenely, it is necessary to have a comprehensive and efficient equipment. EasyCare offers the right solution with smart sheaths but above all with a set of 7Fr. instrumentation much more efficient than the traditional 5Fr. one. Your gesture is precise with an immediate result and your patient satisfied. In addition, each instrument is graduated to ease your surgical marks. »

HD Hysteroscope: Unmatched performances and outstanding durability

Our latest generation of lenses, designed to take full advantage of HD, provides detailed and perfectly clear images even in the backgrounds. This hyper resolution together with a real homogeneous light distribution provides a huge depth of field. The whole image will be sharp! Our HD hysteroscope is of course autoclavable. Its three separate tubes design makes it resistant, durable but also easily repairable in case of accident.

The 7Fr. efficiency!

The 7Fr. scissors blades are 50% longer<sup>1</sup> than the 5Fr. ones, and the volume of material collected with a 7Fr. biopsy forceps is 3 times higher<sup>2</sup> than the 5Fr. !  
The 7Fr. instrumentation is naturally more rigid and more precise than the 5Fr.  
Here again, you save time and keep your patients more comfortable.

<sup>1</sup>: 5.7mm vs 3.8mm  
<sup>2</sup>: 8.23mm<sup>3</sup> vs 3.2mm<sup>3</sup>

Inner atraumatic 4.9 mm sheath

With its blunt tip and even more restrained diameter, the inner sheath has been designed to be used without the outer sheath. It is the ideal tool for acts requiring no aspiration such as permanent contraception, removal of intra-uterine device or the section of type 1 or 2 synechiae.

4mm diagnostic sheath

3 Hysteroscopy systems

Hysteroscopy systems

NeoCare

NEW

A complete operative hysteroscopy set to efficiently treat the majority of uterine pathologies

NeoCare has been designed to allow you the use of 3mm instruments without energy on a regular basis, thus preserving your patients' endometrium. Even in the case of major pathologies such as large calcified fibroids, the performance and precision of 3mm rigid instruments allow you to treat them efficiently, which facilitates surgery in a single-stage.

Bipolar electrodes and 26Fr. resectoscope complete the standard set and allow you to address all intra-cavity uterine pathologies with confidence.

The ultimate in technological achievements

The NeoCare operative hysteroscope has been designed to ensure the best performance and ergonomics. The combination of HD lenses with generous and homogeneous illumination guarantees a bright and high-resolution image. In addition, the wide working channel (4.5mm) provides a powerful irrigation even when using 3mm instruments. Last, our working channel is provided with a patented double valve system that ensures a complete seal.

NeoCare+ for even more versatility!

Since the outer sheath of NeoCare is the same as the one of our MaxiCare resectoscope, you can combine their use during the same surgery. The sheath remains in position in the uterus during the instrument change, avoiding any cervical lacerations. The NeoCare+ set combines NeoCare and MaxiCare. Taking care of your patients has never been easier

**The safety of bipolar**  
Three models of bipolar electrodes are provided to treat all parts of the uterus

**Optimised ergonomics**  
Two stopcocks are available for your irrigation tube for a better working comfort.

**Single-stage procedure even for complex surgeries**  
The efficiency and precision of the 3mm rigid instruments reduce the duration of the operation.

**Sterilisation basket included**  
Our sterilisation basket ensures the safety of your instruments without compromising ease of use and ergonomics.

## ReseCare

### A 6mm only resectoscope: small, but efficient!

The advantages of this small diameter are numerous, both for the surgeon and the patient. With ReseCare, your surgical gesture is precise but also faster since the stages of dilation are less numerous. The chips being small, their presence is less penalizing for your vision and your comfort of work.

ReseCare respects your patients. The insertion resistance is naturally reduced and the use facilitated, even for menopausal women or with a stenotic cervical canal. As a result, the volume of fluid absorbed by the patient is less and confirmed by a systematic input/output balance.

### HD Hysteroscope: Unmatched performances and outstanding durability

Our latest generation of lenses, designed to take full advantage of HD, provides detailed and perfectly clear images even in the backgrounds. This hyper resolution together with a real homogeneous light distribution provides a huge depth of field. The whole image will be sharp! Our HD hysteroscope is of course autoclavable. Its three separate tubes design makes it resistant, durable but also easily repairable in case of accident.

### Bipolar resection

The advantages of this now widely used technology are twofold, both related to the safety of your patients.

First, the electric current no longer passes through the patient but directly returns to the generator through the resectoscope itself. The risks of burns due to the diffusion currents and those of synechia due to damaged endometrium are thus drastically reduced.

But also and above all, a monopolar resectoscope has to use glycocolle whose absorption by the patient is source of ionic disorders that can lead to death. In contrast, instead of glycocolle, a bipolar resectoscope uses a saline solution which is not toxic, and moreover less expensive. Connected to a bipolar generator, ReseCare offers you this extra serenity. It is nevertheless compatible and works perfectly with all monopolar generators.

«After three years of continuous use, we can't get enough of ReseCare! It is faster, simpler and less traumatic.»

Prof. Hervé Fernandez, Head of the Department of OB/GYN of the Kremlin Bicêtre Hospital. France.

#### Comfort and precision guaranteed

The ultra-light PEEK handle avoids fatigue during the surgery. An ergonomic position is provided for each of your fingers. You will have a better hold of the resectoscope and your gesture will be more accurate.

#### Inner rotatable sheath

For a greater freedom of movement during the surgery. Do not let your tools limit you!

#### Quick lock

The end of difficult lockings.

#### Quality to the last detail

A good image also results from a controlled and performing «aspiration-irrigation» couple. The black ceramic eliminates all reflections.

ReseCare XXL

NEW

10  
cm

The latest but not the least model of the range!

It is the length that differentiates ReseCare XXL from ReseCare, and that will allow you to treat your overweight and large uterus patients. Unique on the market, this resectoscope allows easy access to all types of uterus, even those even those that are difficult to access or of unusual size. Patients who are overweight, obese or with a large uterine cavity can be treated with this new product, without compromising the surgeon's comfort.

The ultimate in technology at the service of all women

All the qualities that have made ReseCare so successful are fully reflected in ReseCare XXL. The small diameter allows for great freedom of movement. The HD endoscope makes it easy to visualize the entire uterine cavity with incomparable definition and light distribution. The uterine fundus can be easily reached thanks to its working length of 287mm and all uterine pathologies can be treated thanks to a wide choice of resection electrodes.

A diagnostic set also available in XXL

Just like ReseCare XXL, the XXL diagnostic set provides better visibility of large or hard-to-reach uterine cavities. The same high definition image quality is available for efficient diagnosis. The small diameter of the instrument offers comfort of use and precision of gesture. Our XXL products offer a wide range of possibilities to treat all women with respect. Both in diagnostic and operative applications, the size of our products can be adapted to the needs of your patients.

MaxiCare

9mm resectoscopes: the gold standard!

Resection is a worldwide recognized and heavily used technique. It allows efficient treatment of a large number of intrauterine pathologies with a faithful and reproductive technique.

The arrival of bipolar energy made possible, not only to reduce the amount of tissue crossed by electricity, but also to use a less conductive distension fluid, increasing by far the patient safety in case of massive liquid absorption.

This patient safety increase, enlarged even more the use of resectoscopes, making this instrument the gold standard of the intrauterine surgery.

Even if the market is nowadays moving in the direction of mini-resectoscopes, classical 9mm resectoscopes remain compulsory under certain circumstances. Patients with an incompetent cervix being a good example of it, as in this case, leakages will be very limited and intrauterine pression will be maintained easily.

A product committed to picture quality

Every single details of our product have been designed in order to bring you an exceptional image quality.

Our latest generation of lenses match the High Definition (HD) standards, providing detailed and perfectly clear images, even in the backgrounds. This hyper resolution together with a true homogeneous light distribution grant a huge depth of field. Image is sharp everywhere!

Our bipolar technology is so that the current returns back to the generator via the resectoscope itself, so that our electrodes require one single wire. This is a significant advantage in term of visualization (less tool in the field of view), and in term of resection efficiency (chips don't get stuck between the wires).

## Bipolar energy

### Ø 5mm instruments

The instrument is composed of three different parts: the handle, the shaft and the desired insert. According to the application, the insert can be exchanged within seconds.

Reference	Description
D300 120 756	Bipolar handle for 5mm instruments
D300 120 757	5mm shaft Working length: 340mm With rotation module

Reference	Description
D300 120 750	5mm grasping forceps Fenestrated. Double action jaws
D300 120 752	5mm grasping forceps Curved and fenestrated. Double action jaws
D300 120 768	5mm claw forceps Fenestrated. Double action jaws
D300 120 755	5mm grasping forceps With teeth. Fenestrated. Double action jaws
D300 120 770	5mm Delta grasping forceps Fenestrated. Double action jaws
D300 120 769	5mm Duck Bill grasping forceps Fenestrated. Double action jaws
D300 120 751	5mm slim forceps Curved. Double action jaws
D300 120 754	5mm Maryland dissection forceps Curved. Double action jaws

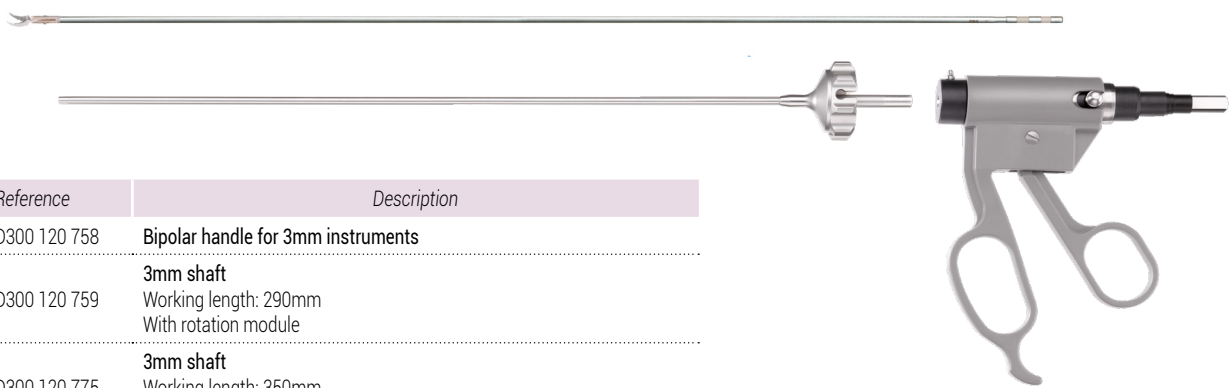

# Laparoscopy forceps

Reference	Description
D300 120 753	5mm curved scissors Metzenbaum type. Double action jaws

### Ø 3mm instruments

In the same way as the 5mm instruments, the same three parts form a 3mm bipolar instrument.

Reference	Description
D300 120 758	Bipolar handle for 3mm instruments
D300 120 759	3mm shaft Working length: 290mm With rotation module
D300 120 775	3mm shaft Working length: 350mm With rotation module

Reference	Description
D300 120 760	3mm grasping forceps Fenestrated. Double action jaws Compatible with shaft reference D300 120 759
D300 120 776	3mm grasping forceps Fenestrated. Double action jaws Compatible with shaft reference D300 120 775

Reference	Description
D300 120 761	3mm Maryland dissector Curved. Double action jaws Compatible with shaft reference D300 120 759

Instruments to assemble

1 Handles

Reference	Description
D300 120 517	<b>Axial ring handle</b> With ratchet

Reference	Description
D300 120 518	<b>Axial handle</b> With ratchet With spreading spring

6 Other laparoscopy instruments

Reference	Description
D300 120 519	Axial angled handle With ratchet With spreading spring

2 Shaft

Reference	Description
D300 120 865	5mm shaft Working length: 330mm With Luer-lock connection

3 Inserts

Reference	Description
D300 120 866	5mm straight needle holder Single action jaws

Reference	Description
D300 120 867	5mm needle holder - left curved Single action jaws

Reference	Description
D300 120 868	5mm needle holder - right curved Single action jaws

Reference	Description
D300 120 869	5mm straight needle holder Convex/concave shaped jaws with fixation teeth Single action jaws

Other laparoscopy instruments

Trocars

Reference	Description
D300 150 003	Ø 5.5mm Trocar set with multifunctional valve Manual and automatic opening valve Pyramidal tip Without insufflation tap Working length: 100mm
D300 150 004	Ø 11mm Trocar set with multifunctional valve Manual and automatic opening valve Pyramidal tip With insufflation tap Working length: 100mm

Reference	Description
D300 150 005	Ø 5.5mm Trocar set with folding valve Pyramidal tip With insufflation tap Working length: 100mm
D300 150 006	Ø 11mm Trocar set with folding valve Pyramidal tip With insufflation tap Working length: 100mm

Reference	Description
D300 150 007	Reducing sleeve Ø 11mm → Ø 5.5mm Working length: 190mm

Reference	Description
D300 150 008	Reducing plastic adaptor Ø 11 or 10mm → Ø 5.5mm

Reference	Description
D300 150 009	Ø 2mm Veress insufflation needle Stopcock and Luer-lock connection Working length: 120mm

Irrigation and suction instruments

Handles and valves

Reference	Description
D300 120 808	3-way-tap With large Luer-lock connection

Reference	Description
D300 120 812	Double plunger valve With large Luer-lock connection

Reference	Description
D300 120 811	Suction-Irrigation compact plastic handle With 3-way-tap With parallel connectors for suction and irrigation With large Luer-lock connection

Cannulas and tubes

Reference	Description
D300 120 806	Ø 5mm Aspiration cannula Needle G18 Working length: 360mm

Reference	Description
D300 120 807	Ø 2.7mm Aspiration cannula Needle G18 Working length: 350mm

Reference	Description
D300 120 809	Ø 5mm Suction-irrigation tube With large Luer-lock connection With large central opening Working length: 350mm

Reference	Description
D300 120 810	Ø 5mm Suction-irrigation tube for hydrodissection With large Luer-lock connection Working length: 350mm

Monopolar electrodes

Ø 5mm Monopolar suction electrodes

Reference	Description
D300 120 813	Ø 5mm L-Hook electrode with suction Working length: 350mm

Reference	Description
D300 120 814	Ø 5mm Button electrode with suction Working length: 350mm

Reference	Description
D300 120 815	Ø 5mm Spatula electrode with suction Working length: 350mm

Reference	Description
D300 120 816	Ø 5mm J-Hook electrode with suction Working length: 350mm

Ø 5mm Monopolar electrodes

Reference	Description
D300 120 649	Ø 5mm L-Hook electrode Working length: 350mm

Reference	Description
D300 120 650	Ø 5mm Button electrode Working length: 350mm

Reference	Description
D300 120 652	Ø 5mm Spatula electrode Working length: 350mm

Reference	Description
D300 120 651	Ø 5mm J-Hook electrode Working length: 350mm

Ø 2.7mm Monopolar electrodes

Reference	Description
D300 120 653	Ø 2.7mm L-Hook electrode Working length: 350mm

Bipolar electrodes

Ø 5mm Bipolar electrodes

Reference	Description
D300 120 771	Ø 5mm J-Hook electrode Working length: 340mm

Reference	Description
D300 120 765	Ø 5mm L-Hook electrode Working length: 340mm

Reference	Description
D300 120 767	Ø 5mm Button electrode Working length: 340mm

Reference	Description
D300 120 766	Ø 5mm Spatula electrode Working length: 340mm

Ø 3mm Bipolar electrodes

Reference	Description
D300 120 762	Ø 3mm L-Hook electrode Working length: 340mm
D300 120 772	Ø 3mm L-Hook electrode Working length: 360mm

Reference	Description
D300 120 764	Ø 3mm V-Hook electrode Working length: 340mm
D300 120 774	Ø 3mm V-Hook electrode Working length: 360mm

Reference	Description
D300 120 763	Ø 3mm straight electrode Working length: 340mm
D300 120 773	Ø 3mm straight electrode Working length: 360mm

Myom drillers

Reference	Description
D300 120 628	Ø 10mm Myom driller Working length: 330mm
Reference	Description
D300 120 627	Ø 5mm Myom driller Working length: 330mm
Reference	Description
D300 120 626	Ø 3mm Myom driller Working length: 330mm

Uterine manipulators

Mangeshikar

Reference	Description
D300 120 100	Handle With Pozzi forceps rotation module
Reference	Description
D300 120 101	Outer sheath With fixation screw
Reference	Description
D300 120 102	Inner sheath
Reference	Description
D300 120 107	Pozzi forceps For cervical holding
Reference	Description
D300 120 103	Sliding sheath To use with cap With a sealing plug
Reference	Description
D300 120 104	Ø 35mm Cap With white insulating ring
D300 120 105	Ø 40mm Cap With white insulating ring
D300 120 106	Ø 45mm Cap With white insulating ring
Reference	Description
D300 120 108	Intra-uterine insert 4x40mm
D300 120 109	Intra-uterine insert 5x50mm
D300 120 110	Intra-uterine insert 6x60mm
D300 120 111	Intra-uterine insert 7x70mm
D300 120 112	Intra-uterine insert 8x80mm
D300 120 113	Intra-uterine insert 8x120mm
D300 120 114	Intra-uterine insert 8x150mm

Cohen

Reference	Description
D300 120 115	<b>Cohen uterine manipulator</b> With two different sizes of sealing cone With Luer-lock connection

Endojack

Reference	Description
D250 100 000	<b>Endojack uterine manipulator</b> Sterile & single use - 5 units / box Length of the intra-uterine insert: 60 - 70mm
D250 100 001	<b>Endojack uterine manipulator</b> Sterile & single use - 5 units / box Length of the intra-uterine insert: 80 - 90mm

Light cables

Light cables

Reference	Description
D200 150 000	Ø 3.5mm grey light cable Length: 2.3m Delivered without any connectors
D200 150 500	Ø 3.5mm grey light cable Length: 2.3m Delivered with Storz connectors on both sides
D200 150 005	Ø 4.8mm grey light cable Length: 2.3m Delivered without any connectors
D200 150 501	Ø 4.8mm grey light cable Length: 2.3m Delivered with Storz connectors on both sides

Connectors

Reference	Description
D200 150 001	Storz connector for light cable Endoscope side

Reference	Description
D200 150 002	Storz connector for light cable Light source side

Reference	Description
D200 150 003	Olympus connector for light cable Light source side

Reference	Description
D200 150 004	ACMI / Stryker connector for light cable Light source side

HF cables

Bipolar resection cables

Reference	Description
D200 190 001	Erbe bipolar resection cable Length: 4.0m Compatible with all our bipolar resectoscopes To connect with Erbe Vio 300D or Erbe Vio 3 electrosurgery units (MF plug)

Reference	Description
D200 190 006	2 pins - 29mm (international plug) bipolar resection cable Length: 4.5m Compatible with all our bipolar resectoscopes To connect with 2 pins - 29mm connection electrosurgery units

Reference	Description
D200 190 007	iSpark (SDS plug) bipolar resection cable Length: 4.5m Compatible with all our bipolar resectoscopes To connect with iSpark electrosurgery unit

Monopolar resection cables

Reference	Description
D200 190 005	8mm banana plug monopolar resection cable Length: 3.0m Compatible with all our monopolar resectoscopes To connect with Valleylab, Karl Storz or Conmed electrosurgery units

Reference	Description
D200 190 004	4mm banana plug monopolar resection cable Length: 3.0m Compatible with all our monopolar resectoscopes To connect with Erbe T-serie, Martin or Berchtold electrosurgery units

Reference	Description
D200 190 011	<b>4mm plug monopolar resection cable</b> Length: 3.0m Compatible with all our monopolar resectoscopes To connect with Martin or Berchtold electrosurgery units

Reference	Description
D200 190 010	<b>5mm plug monopolar resection cable</b> Length: 3.0m Compatible with all our monopolar resectoscopes To connect with Erbe ACC/ICC or Karl Storz electrosurgery units

Bipolar HF cables

Reference	Description
D200 190 003	<b>Valleylab bipolar HF cable</b> Length: 3.0m Compatible with all our bipolar instruments (hysteroscopy & laparoscopy) To connect with Valleylab and international electrosurgery units

Reference	Description
D200 190 002	<b>Erbe bipolar HF cable</b> Length: 3.0m Compatible with all our bipolar instruments (hysteroscopy & laparoscopy) To connect with Erbe electrosurgery units

Reference	Description
