7 COMMITMENTS

**to guide our actions
and to confirm our convictions**

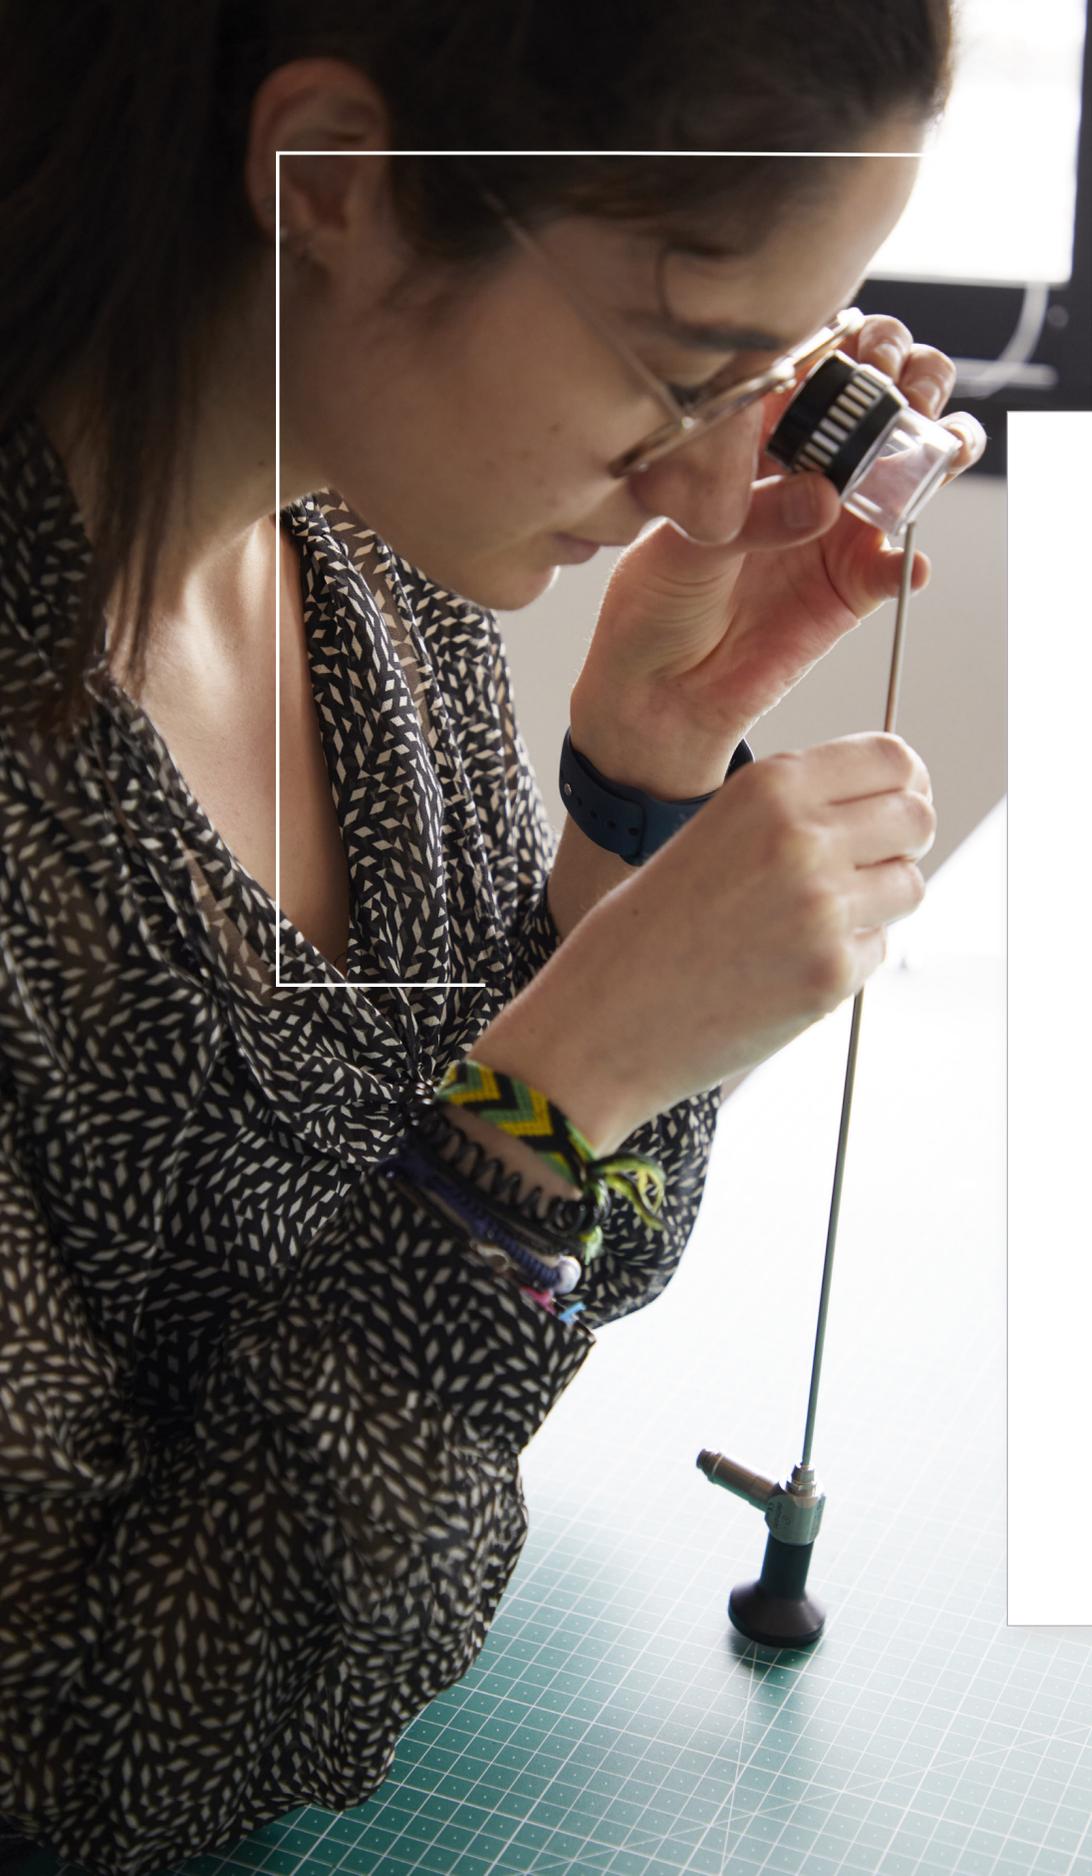

OUR MISSION: THE WELL-BEING OF WOMEN

We consider the **comfort and safety of our patients** as our priority.

Reducing trauma is a crucial issue and our most outstanding achievement.

Technological research allows us to develop products
to treat all patients and pathologies
and to realise our goal of **IMPROVING PATIENT CARE.**

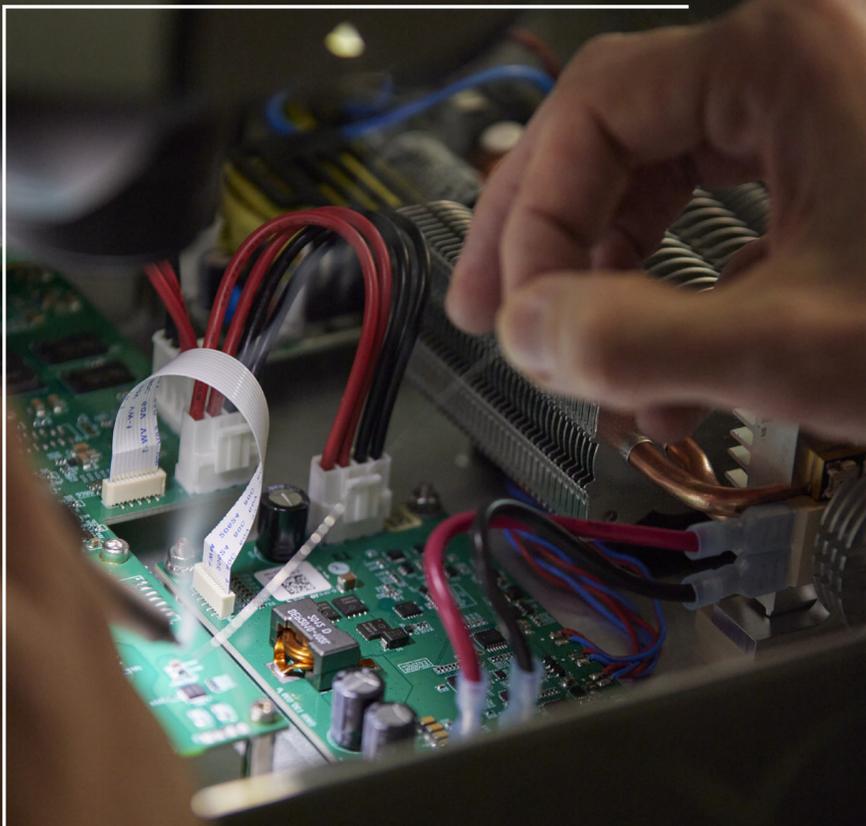

CUSTOMER SATISFACTION

Users' satisfaction is at the heart of all our decision-making.

Availability and reactivity are essential values in our daily business.

Our support is the cornerstone of a **RELATIONSHIP OF TRUST**, allowing us to remain a partner who can always be relied on.

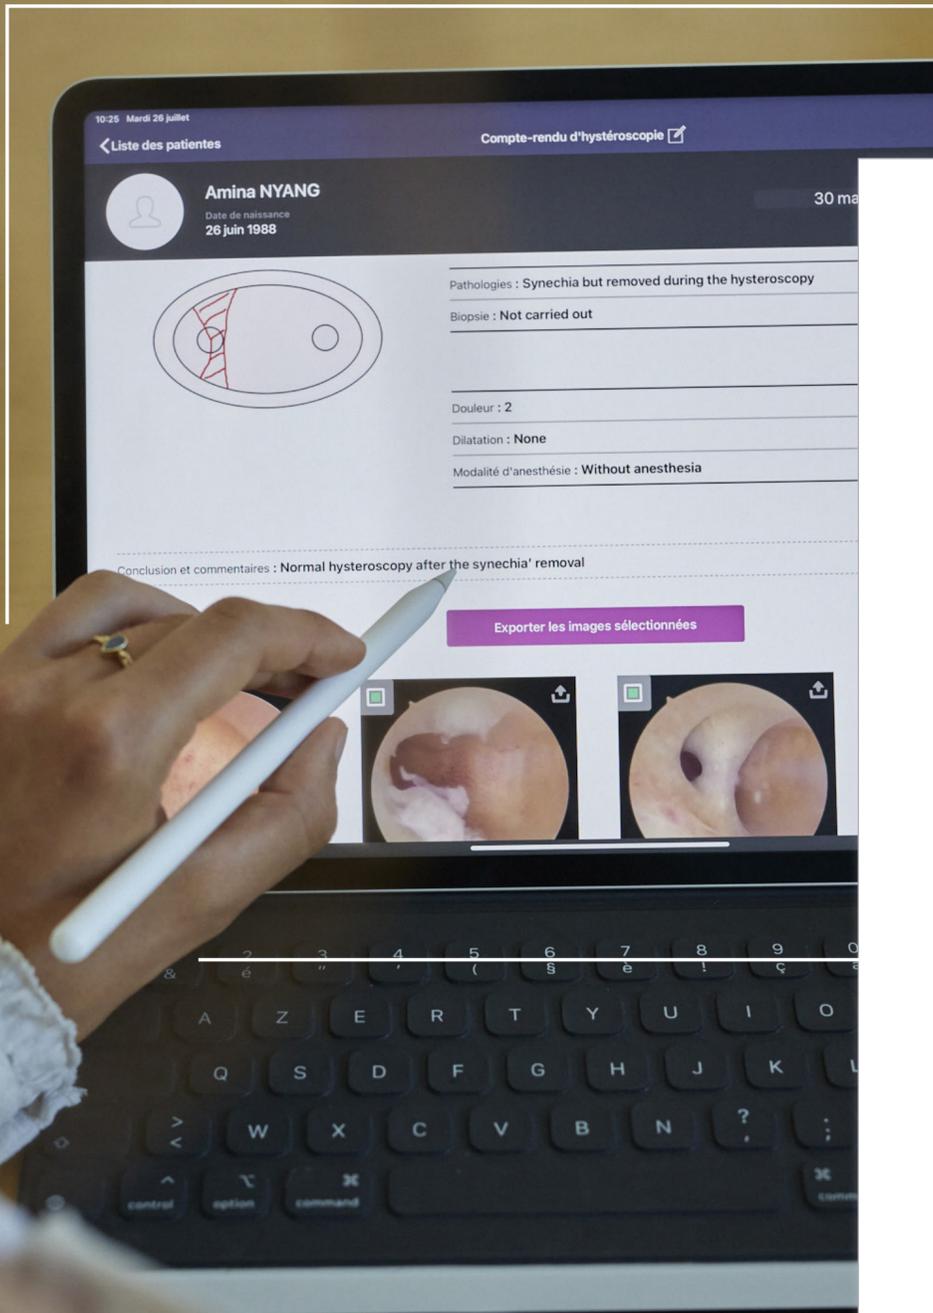

EXCELLENCE AS A RULE

The quality of our products is more than a strategy.
It is **OUR "RAISON D'ETRE"** and why we are at the top of our market.

We are committed to excellence throughout the chain of production:
design, manufacturing and distribution.

Our products' design, performance and efficiency
are evidence of this commitment.

DRIVEN BY **INNOVATION**

Gynaecologists are at the starting point of all new research and development and give inspiration to our teams all along the design of new products.

Thanks to this collaboration, our products **ALWAYS MATCH THE MARKET NEEDS.**

Our drive to innovate **has led to the registration of patents** in fields such as instrumentation and imaging technologies.

WILLING TO COMMIT

Due to our close relationship with gynaecologists, we are facing the many situations of vulnerability experienced by women around the world.

This is why we have become involved in several specialized organisations supporting them.

Our commitment extends to environmental issues, affecting our choices **ON BOTH A PERSONAL AND A COLLECTIVE LEVEL.**

We encourage an ethical approach to business with our teams, clients, and suppliers.

COLLECTIVE SPIRIT

Our business is run on a **HUMAN SCALE.**

We value a company culture based on **kindness, respect for diversity and self-fulfilment.**

Every team member can evolve in a workplace that supports their well-being and the development of their skills.

MADE IN FRANCE

All our innovation, design and production is in France.
This is a source of **GREAT PRIDE.**

Our business in France supports the national economy
and the development of new technologies.

Encouraging the label "French quality" is integral to our philosophy.
