

2024 COMPANY PROFILE

Vision, mission and values

Vision

To create a complete product ecosystem for **gynecologists** in line with the general trend of the outpatient surgery and more particularly with the "See & Treat" concepts.

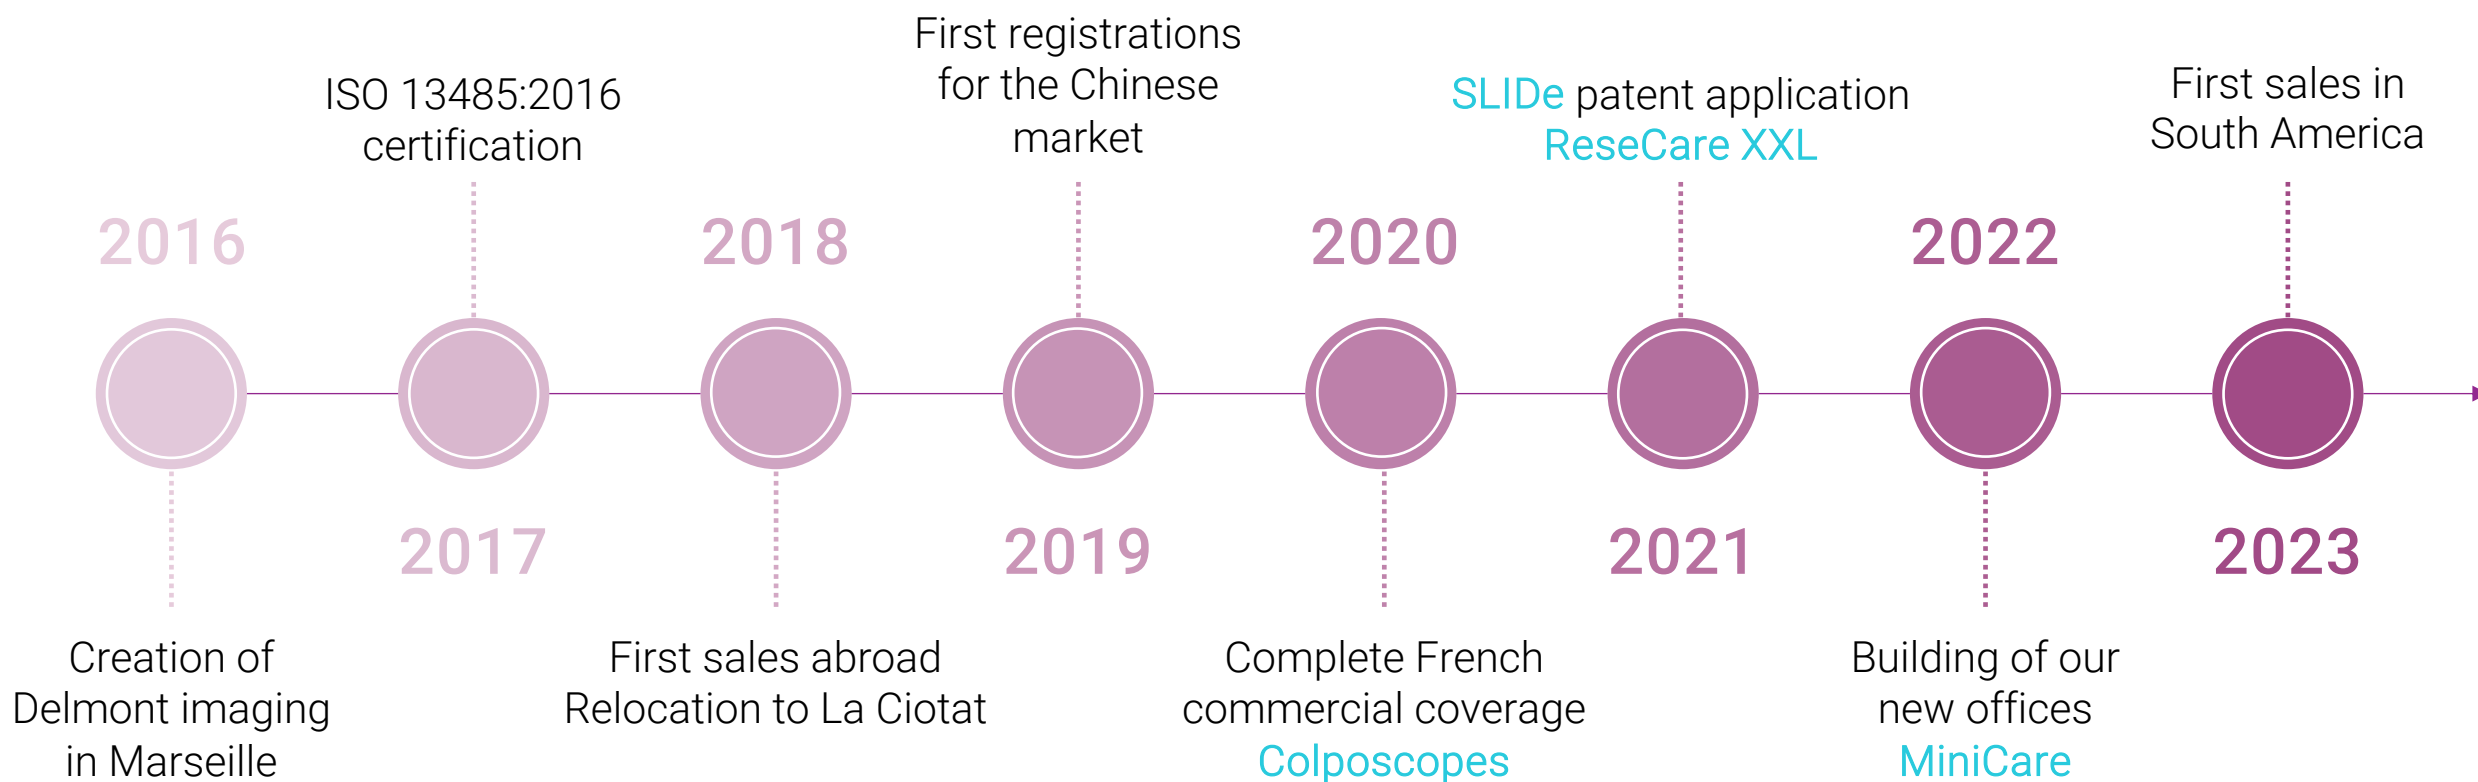

Values

- Patient well-being
- Customer satisfaction
- Innovation
- Excellence
- Collective spirit
- Willing to commit

Mission

To improve the care and management of **all patients**, regardless of age and future, by providing innovative, effective and less traumatic solutions.

WORLD

Pr. Fernandez
President of the scientific council

“

I was looking for teams to work with to develop certain products nonexistent on the market. I was having difficulties with companies on the market, but with Delmont, we quickly found common ideas that we were then able to develop.

”

Departments

Quality & Regulatory

Flagship products: iCare+

Complete imaging station, dedicated to hysteroscopy in consulting or ambulatory rooms. OR-like image quality!

2 in 1

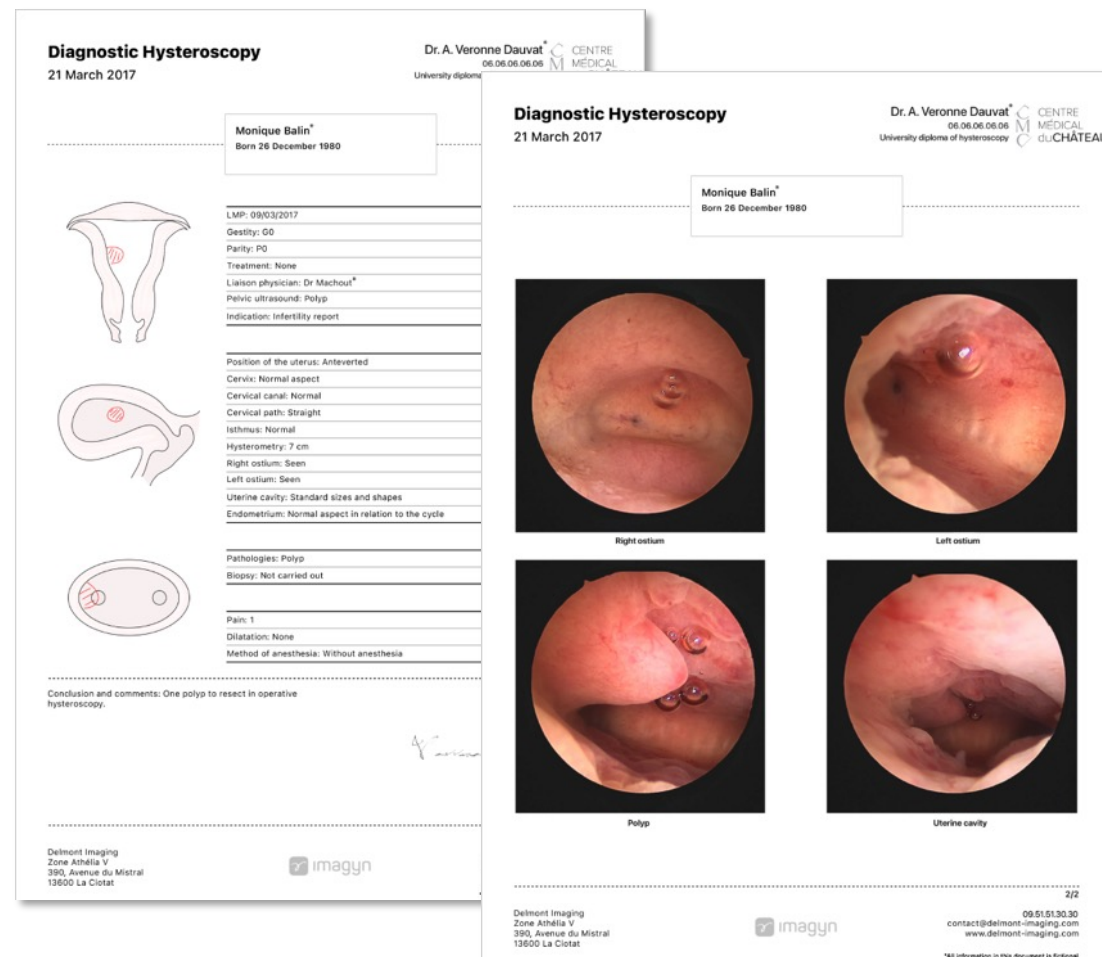

HD camera +
LED light source

Interoperability

Intuitive interface

Flagship products: colposcopy

NEW

« Rediscover colposcopy
with iCare^{mini} »

Top of the range

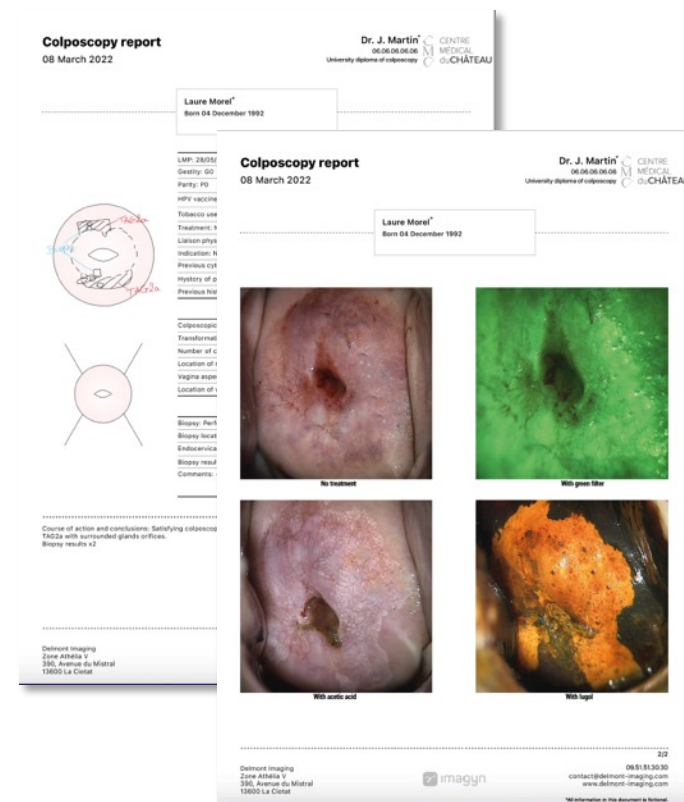

Several configurations assuring
working comfort

Numerous accessories for a
product adapted to your needs

A full range of colposcopes guaranteeing
high-precision examinations and an extra-
sharp image.

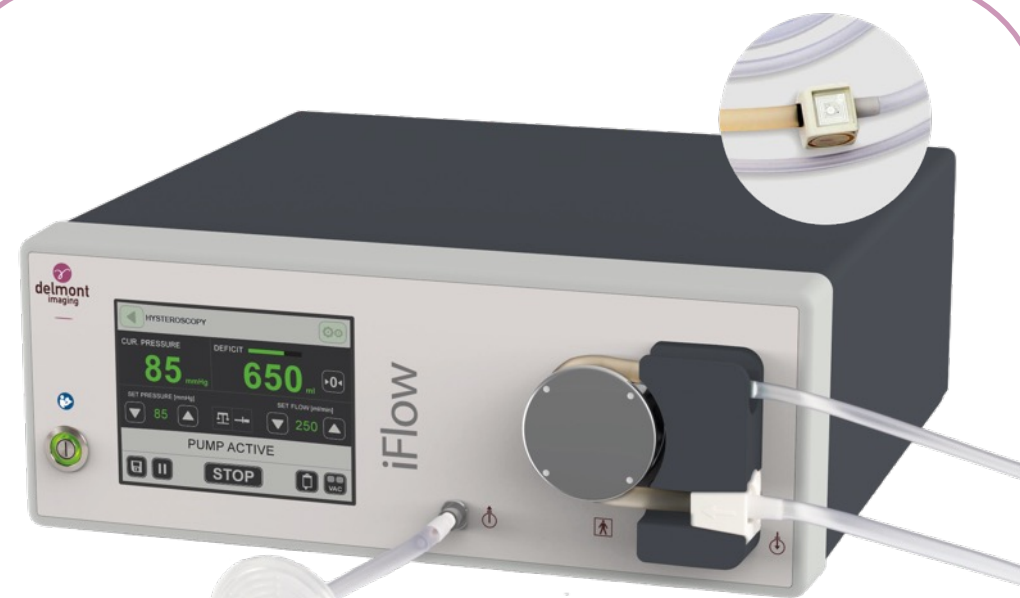

Other products : equipments

HF generator - iSpark

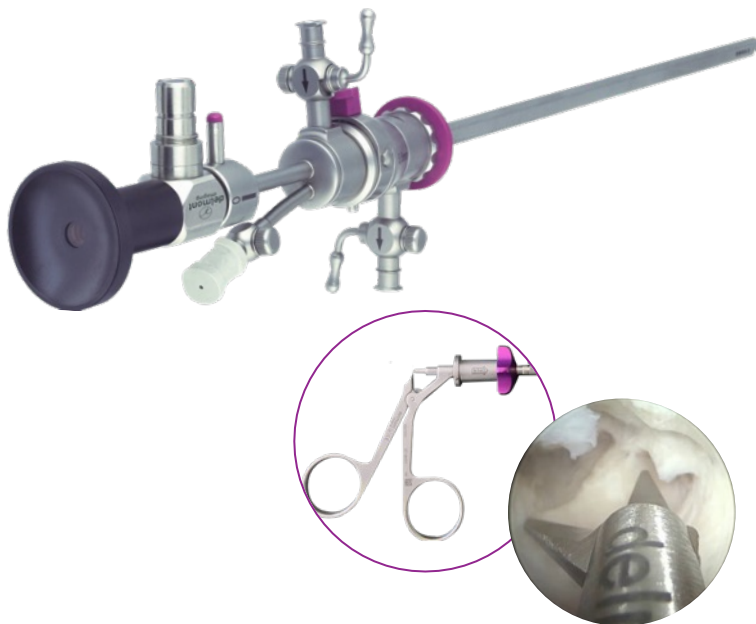

A reliable, versatile and powerful **high frequency electrosurgery unit**, iSpark is suitable for both outpatient rooms and operating rooms.

Irrigation pump - iFlow

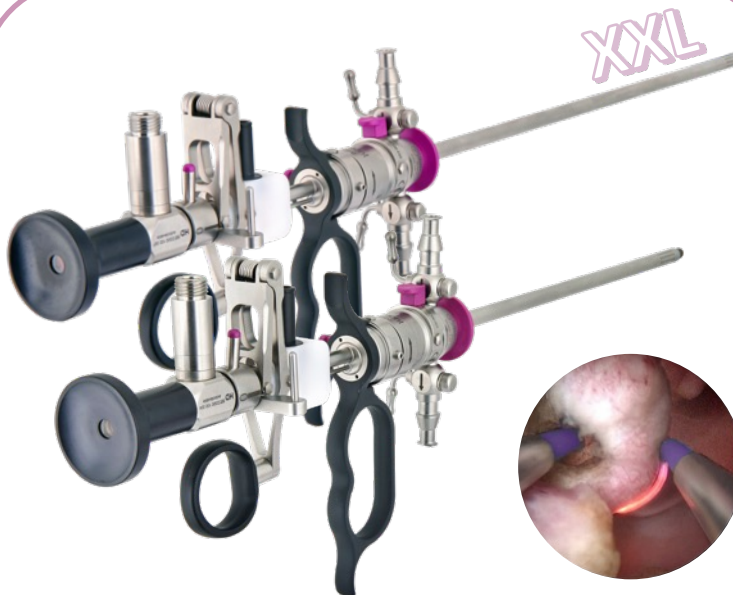

An indispensable complement to **safe and clear** operative hysteroscopies. iFlow can also be used in Urology, Laparoscopy and Arthroscopy procedures.

Flagship products : instrumentation

EasyCare

Without energy, it combines 7Fr. performances and small diameter. Perfectly suited for nulliparous patients and infertile couples.

ReseCare

6mm hybrid resectoscopes: the low or no dilatation makes it ideal for nulliparous, menopausal patients or those with a stenotic cervix.

MiniCare

3mm cold instruments and a reduced 6mm outer diameter: it is the perfect combination of endometrial preservation and performances.

Innovation: iFlow mini

iFlow mini is an irrigation and suction pump.
The constant pressure is ideal for an **optimal visualization**.

- A comprehensive gynecologic tool: hysteroscopy and laparoscopy.
- Displays all the information in real time.
- Compact and easy to use.

Combined to iCare+ for a complete hysteroscopic in-office solution.
Also fully matched the needs of your gynecologic operating room!

Innovation: Clearview

Easy chips extraction for an empty and clean uterine cavity in no time!

Combination of a single use handle and a reusable sheath compatible with our **resectoscopes**.

Unique on the market. This innovative concept was designed with and for gynecological surgeons.

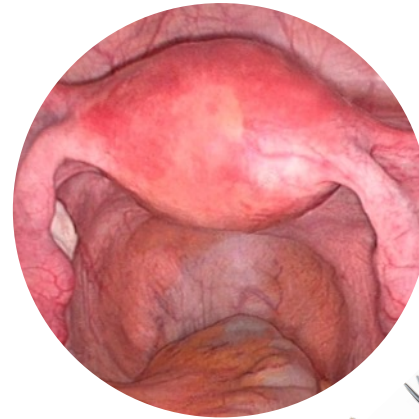

Patent granted. Project supported by BPI.

Other products: laparoscopy

Our laparoscopic range includes more than **150 references**. Below some product families of the range:

- Laparoscopes
- Trocars
- Grasping and dissecting forceps
- Scissors and biopsy forceps
- Suture and ligation
- Accessories
- Uterine manipulators
